

Statement of SOHAIL SALEM

I am enchanted by the successive and thin touches of color, a sight that I find expressive of myself and of what surrounds me.

I describe it as "expression across line and color."

Most of what I present belongs to the expressionist side of art.

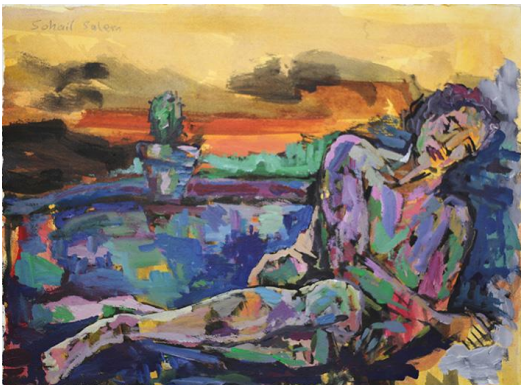

My subjects are simple and close, they formed from of human beings and Still life.

Intentionally to the intended modification and distortion, I display internal stress and personal. It is an attempt to visualize the generalization of the totality of feelings and the inner movement anxiety I have.

Psychological expression of a point of view on the issue of life and society.

Produced some installations art projects, the last one was "a boat from Gaza."

I used recycled materials, "empty plastic bottles", besides; I have experience in sculpture, photography, graphic design, and marionette.
